

## **Company Introduction**

**VitrinaBox is a highly promising startup with a use of cutting edge technologies. We are very excited to announce that we're hiring to continue our production stage. We are looking to grow our technical team members of our Startup.**

## **Back-End C# Web Developer**

### **Job Description**

We are looking for a Back-End C# Web Developer responsible for managing the interchange of data between the server and the users. Your primary focus will be the development of all server-side logic, definition and maintenance of the central API domain, and ensuring high performance and responsiveness to requests from the front-end. A basic understanding of front-end technologies is therefore necessary as well. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

### **Responsibilities**

- Build reusable code and libraries for future use.
- Integration of user-facing elements developed by a front-end developer with server side logic.
- Building reusable code and libraries for future use.
- Optimization of the application for maximum speed and scalability.
- Implementation of security and data protection.
- Design and implementation of data storage solutions.
- Optimize components for maximum speed and scalability.
- Collaborate with other team members and stakeholders.

## Skills and Qualifications

- A serious relationship with our startup.
- Self-directed team player who thrives in a continually changing environment.
- Experience C# Microsoft Visual Studio.
- Experience ASP.Net MVC and Implementing Authentication Identity and Security.
- Experience on ASP.Net Web.API
- Experience on ORM tools (NHibernate) & Transact-SQL.
- Experience with highly scalable/high traffic solutions.
- Use Source Control e.g., SVN, Git, Continuous Integration.
- Basic understanding of front-end technologies and platforms, such as JavaScript, TypeScript, HTML5, and CSS3.
- Understanding of asynchronous request handling, partial page updates, and AJAX.
- Understanding of cross-browser compatibility issues and ways to work around such issues.
- Military obligations for men should be accomplished.

## Other desirable, but non-essential skills:

- .NET Core 2
- Experience using MongoDB and its C# Drivers.
- Windows Azure.
- MS SQL Administration.
- SignalR.
- Xamarin Studio.
- Experience with the EMGU (OpenCV) libraries.
- Experience with media encoding patterns, data compression and playback efficiency.
- A minimum of 2 years of experience.
- SOLID design principles.

## We Offer (according to Skills)

- **Monthly wage (Market competitive salary).**
- **Bonus at the end of the project.**
- Team Leader Developer Role.
- Flexible Working (10:30-18:30).
- Athens Down Town, work location.
- Morning Coffee.

**Portfolio is essential of previous or/and current work.**
